ProGrant - a game-changing programme and project management tool for NGOs

Funding for the NGO sector is shifting from individuals to grants, but do you have the systems capability to meet the challenge this presents?

ProGrant has been designed and is proven to help you overcome the issues arising from:

- Legacy systems and onerous insecure spreadsheets
- Collaborating with other charities and managing large numbers of in-country partners
- Meeting contractual and ad-hoc data reporting requirements of donors

ProGrant has been built around four key principles of Visibility, Traceability, Connectivity and Reporting – the pillars to successful financial management for any grant funded body relying on large-scale grant funding to deliver its work.

Visibility

An incisive, strategic view of operational performance in one place

- Bring together project, programme and financial data
- Top-to-bottom and ground up project and budget planning
- Track performance vs target
- Track spend, drive collaborative procurement and maximise value-for-money
- Manage all your projects in one place, removing data silos
- Provide evidence backed analysis internally and externally
- Manage all claims, variations and budgets with a small team
- Manage partner activity with standardised processes

Traceability

Evidence backed analysis of the benefit of each £, $ or €

- ProGrant provides accountability and performance measurement against KPIs for all funds, projects, partners and programmes.
- Full auditability of all user-activity on the system provides strong anti-fraud security
PLAN → DELIVER → MEASURE → REPORT

Connectivity

Secure access from anywhere to integrated financial and operational data

- Cloud-based, ProGrant can be easily and quickly deployed across your entire organisation.
- Its light footprint and structure means it is accessible and usable across your entire organisation and by your remote partners.
- Integrates easily with ERP, P2P and HR systems including ProActis and Infor SunSystems

Reporting

Automated, live and accurate internal and external reporting

- Live, drillable data provides for better, more strategic decision making
- Configurable Business Intelligence (BI) reporting, offers evidence backed analysis for Donors
- Dashboards deliver at-a-glance progress vs target both internally and externally
- Automated report generation makes reporting processes painless
- Budget and claims management reporting helps to closely monitor partner activity

Key Features & Benefits

Grant Management
Get the advantage to gain grants with the ability to demonstrate visibility and transparency across your organisation

Project and Programme Management
Optimise processes, standardise cycles and maximise productivity

Tailored Donor Reporting
Easily set-up complex Donor reports, and impress with rapid responses to ad-hoc queries with drillable, top-to-bottom reporting and evidence backed analysis

Dashboards
Drive strategic decision making with at-a-glance performance vs target dashboards

Procurement, Spend and Cash-flow Control
Maximise value-for-money with combined purchasing power across projects, programmes and partners

Budgeting and Payments
Collaborative budgeting and claims management by project, programme, region, country and partner

Simple Effective Partner Management
Management and engagement of partners for federations and NGOs in one place

Fully Integrated
Remove data silos by connecting ProGrant with ERP, P2P, HR and other internal systems

Simple, Fast and Cost Effective to Deploy

ProGrant has a simple licence structure based on blocks of users and is priced on a monthly subscription model to include on-going maintenance and support.

ProGrant is developed and supported by Intouch Business (UK) LLP, a UK software development company based in West Sussex.
